

AVENEER HANDS-ON

Supply List

This “hands-on” class will concentrate on the “new and different” features from previous Brother machines. If you cannot bring your machine you can still benefit from demonstrations and information. Our store training on the machine took place in August, and not on fully functional machines but on prototypes, so even for us this is all new. We will not actually stitch much in the class, but work on-screen. Many of you don’t do much “sewing” but those features will be covered as well as embroidery and photoplay. The Design Center has not changed much and classes here cover that well, but I will be happy to demo and answer any questions about that too.

Bring: Brother Aveneer with embroidery unit, power cord and foot control

- Accessory Box (the big white one)
- large square hoop (10 5/8”)
- Thread and bobbin (any color)
- Stylus (should be in the accessory box)

I will provide fabric and stabilizer for any practice stitching

Please think about anything special that you would like work with involving your machine—I want you to go home knowing more than you did!!! I know many of you are “watching” the Angela Wolfe master classes—and they are very well done, as well as others online. I prefer “hands-on live” but I understand how hard that is—so please let me know what you would like to do!!!
