

BROTHER AVENEER HANDS-ON OCTOBER 10, 2026

This hands-on class for the Brother Aveneer will cover special techniques and features of your machine. It will NOT cover the new upgrade, as there was a demo class on September 12. I will be happy to answer any question about it for you.

We will not do a lot of stitching in this class, as it takes too long. If you want to only bring the machine and not the embroidery unit you can share or watch mine, but it's always more "educational" to use your own. We will "practice" with picture play, the projector, guideline markers, tapering, stitch regulation, directional stitching, Custom stitch, scanning and more.

We will "play" with Design Center (quilting), Print 'n Stitch, Couching, and more.

Bring: Brother Aveneer with embroidery unit, power cord and foot control

- 10 5/8" square hoop
- embroidery thread and bobbin (just one—not white)
- Scanning Mat
- Accessory Box
- Stitch Regulator foot
- USB (just in case)
- Mouse or stylus

There is a "Playbook" available now for the Aveneer if you would like to order one.
