SEWING BASICS
Supply List

This is a workshop class to help you with basic sewing and sewing machine skills. We will take a good look at your machine and accessories, and learn to use some of those items along with basic machine stitches. We will install a zipper and stitch several hems and seams as well. We will also stitch a buttonhole with your machine. We will be stitching up a couple of small fabric items to practice stitching, as well as looking at commercial patterns.

***If you cannot thread or basically operate your machine you will have trouble in this class. How much we accomplish will depend on how well you can learn the basics here. This is not a machine instruction class. Machine must be in working order at class time—please ask if you are not sure—we want to help!*

Bring: Sewing machine with power cord and foot control
- -All of your machine accessories (usually in a box, bag or the accessory tray on the machine)
- -One spool of sewing thread with wound bobbin (if you are not sure how to wind your bobbin we will do it here)
- -Scissors, seam gauge, washable marker and ripper (these are available here if you need to purchase anything)
- -Tape measure
- -One fat quarter of cotton--available here--any color

If you have any special questions or skills that you would like to go over, just bring your ideas to class. Fabrics will be provided at the class for your samples.
