

Scan N Cut Valentine's Project

Class #122 Feb 2, 2026

Come join us to create a cute "YOU ARE LOVED" T-shirt. We will be using 4 heat transfer vinyl's to create it. The sample is made with 2 solid HTV vinyls and 2 glitter HTV vinyls. The process I will be teaching will help you become more confident in creating multiple colored projects. Of course you can make this as a pillow as well!

We will take you through the steps in the canvas workspace application. The techniques taught can be used to create many different effects.

Supply List

T-shirt (or whatever you want to put the design on)
Laptop, power cord and mouse
Scan N Cut machine with power cord and USB thumb drive
Standard Mat
Weeding tool
2 - 12"x12" Solid HTV
2 - 12"x12" Glitter HTV
(Calliepop Vinyl carries a wonderful selection of vinyls)

Please make sure you have a Brother Canvas workspace account --it's free to set up. We will be using the web version of it which is located at .:

<https://canvasworkspace.brother.com/en/Home>

I know everyone's color choices are different so I was not planning on putting together a kit.

Barbara Hembree --Instructor
