

BROTHER SPECIAL TECHNIQUES

Supply List

This class will be to introduce you, or familiarize you with some of the amazing features on your upscale Brother machine. You will "know" some of them, but practice always helps! Most features are in the "Edit" function of embroidery or "side menu" of the sewing menu. Some features included are: Letter Editing, Auto Frame, Auto Applique, Bordering function or all over design, ReSize, Camera, Snowman or Projector position, Placement, Twin needle, programming, laser light, tapering, color edit, basting to hoop, single color, corner check and more. If you are not sure if your machine "qualifies" for this class just call and ask Jeannie.

*****This is a "robust" list, and not all features are on all models, but we will do as many as possible and have fun!!***

Bring: Brother computerized machine with power cord and foot control

- Embroidery Unit and embroidery foot
- Embroidery Hoop-6 X 10, 9 ½ sq, or 10 5/8" square—not magnetic
- Presser feet "box" or bag with extra feet including "Move It"
- Washable or Iron off marker
- Ruler
- Three colors of thread—embroidery preferred
- Embroidery (lightweight) bobbin
- Tear Away stabilizer—1 yard at least 12" wide

Fabrics for practice stitchouts will be provided, as well as any "extra" threads or aids needed.

Note: Design Center is not included in this class as not all machines have this feature. Design Center Basics is a separate class.
