Cut N Stitch Software

Class # 305

We will continue working in Cut N Stitch software to create embroidery files, applique fil.es and cut files for vinyl crafting.

Pre-class homework:

1. Go to the "Craft Shapes" icon (open red heart, Upper Left) and review all the artwork designs in all the categories. Select a Halloween design (under Holidays & Seasons) you would like to convert to an embroidery stitch file.
2. Read Section 7 in the Cut N Stitch User's Manual

Supply List:

- Laptop computer, power cord
- Mouse and **MOUSE PAD (the mats in the class room are not "mouse friendly")**
- Cut N Stitch software installed, activated **and updated** on your computer. We will not be able to load software in class.
- USB stick 2 GB Empty -- Has no other files or pictures
- Optional: Notebook to take notes

If you don't have the software but want to see it work, download the free Embroidery Tool Shed at <https://oesd.com/software> and come to class! This allows you to get a trial version of Cut N Stitch software for class.
