

We will continue working in Cut N Stitch software to create embroidery files, applique files and cut files for vinyl crafting.

The focus for this class: **CREATE YOUR OWN PROJECT!** You will create a design in the software, then cut it out on the Scan N Cut.

PRE-WORK: Have an idea of what type of design you want to create and cut in class. You can choose to make an applique design or a design to cut from HTV (heat transfer vinyl)

Supply List:

- Laptop computer, power cord, mouse and **MOUSE PAD**
 - Cut N Stitch software installed and activated on your computer.
 - USB stick 2 GB Empty -- Has no other files or pictures
 - Optional: Notebook to take notes
-
- Scan N Cut digital cutter with power cord, stylus, brayer, etc. The cutter has to be able to do half-cuts.
 - **Bring all your weeding tools!!**
 - Cutting Mat
 - Blue painters tape. Or pink, white temporary tape

NOTE: Bring the fabric OR vinyl you want to cut for your design (Fabric has to be prepped with Heat N Bond Lite or a similar fusible web.) Bring the colors in amounts needed for your design. If you want to attach/fuse your creation in class, bring whatever item you want to put it on.

You will create your own design – use these for inspiration:
