

BIG BLOOM /POINSETTIA PANEL

Supply List--9/17/25

Oh, what fun this is!!--We will work with Design Center on your Brother machines, using several techniques to add textured stitching to your fabric. Depending on your machine (Dream, Stellaire, Luminaire or Aveneer) and upgrades, you will be able to adjust designs for lots of variety.

For Viking and Pfaff machines we will use Design/Perfect Positioning and templates.

I will also show and demonstrate the Stitch Delight files which were created for these panels. There are 52 designs and they are beautiful, and the editing, resizing and placement work great on your machines. If you would like to order those for class go to: StitchDelight.com. (Choose "Big Bloom" or Poinsettia) I will share one in class for you to try at no charge.

Bring: Fabric panel --panel needs to be pressed and "sized"

- Batting (lightweight cotton or blend) or Fusible Fleece, cut larger than your panel
- Backing fabric cut larger than the panel (can match batting size)
- Embroidery machine with power cord and embroidery foot
- Large hoop--magnetic hoops work great too
- Thread and bobbin--your choice of fiber and color
- Good needles--topstitch 14, embroidery 14, quilting 14 or purple needle
- Stylus, electric pen and/or mouse
- USB for sample file
- Small scissors
- Basting spray and curved pins
