

## AVENEER HANDS-ON—SEPTEMBER, 2025

### Supply List

This class will be a “workshop” style, which means we will work with several features and techniques, but not make a “project”.

I would like to have you bring only the machine head, without bringing the embroidery unit. We can work with techniques in embroidery without the unit, as we will not “stitch out” designs.

This might include some review if you took the starter class, but usually practice is good. We will try out the ISR, Taper, Laser, Custom Stitch, Guideline markers, Applique, Free motion and in the Embroidery functions the Picture Play feature, Design Center, re-size and more. If you want to go over anything that

I don’t plan, just be ready to ask—I want you to learn your machine as much as possible!!

I will have my machine set up with the embroidery unit so that we can see any function “in operation” if needed.

Bring: Brother Aveneer machine (without embroidery unit)

- Power cord and foot control
- Stylus or mouse
- Machine accessory box with all feet
- Fat quarter of “tone on tone” or light colored cotton
  - \*\*I will have stabilizer for you, and quilt “sandwiches”
- Filled bobbin (pre-filled is fine)
- Two cones of embroidery thread to stitch samples
- Scissors
- Washable or Iron-off marker and small ruler
